¹ Source: Analysis of City of St. Paul Department of Safety and Inspections Fire Certificate of Occupancy data. Note: The City of St. Paul requires inspections of non-owner-occupied housing units on a regular basis. Class C and Class D properties are those that are least compliant with all state and local safety codes, triggering re-inspection every two years (Class C) or one year (Class D). Reported units only include those which receive a Fire Certificate of Occupancy grade, a practice which is only required for single family homes and duplexes that are not owner-occupied, and for rental properties of three or more units, and excludes units that mix residential with other uses.
