² Ibid. For purposes of this report, we define “NOAH” private market housing that is affordable to 60% of Area Median Income, including likely utility costs, depending on number of bedrooms and building type. HousingLink follows widely-accepted basic practices for analyzing housing affordability, which involve comparing rents to area median incomes provided every October by HUD. Their adjustments, tied closely to inflation, resulted in much higher income estimates this year and, thus, much higher thresholds for affordability. It is important to remember that an overall standard of “affordability” is a broad brush and individual families looking for housing can only evaluate the notion of “affordable” relative to their own circumstances. To learn more about how HousingLink calculates affordability by area median income, watch this video. To learn more about NOAH rental supply, watch this video.

¹ AMI (Area Median Income) is $82,200 for an individual and $117,300 for a family of four in the Twin Cities Metro (HUD, 2022). HousingLink follows widely-accepted basic practices for analyzing housing affordability, which involve comparing rents to area median incomes provided every October by HUD. Their adjustments, tied closely to inflation, resulted in much higher income estimates this year and, thus, much higher thresholds for affordability. It is important to remember that an overall standard of "affordability" is a broad brush and individual families looking for housing can only evaluate the notion of "affordable" relative to their own circumstances. Rental Housing Stock

Rental Unit Inspections – Q3 2022¹

69,978 Certified units with a grade

2,522 Units in Class C and D properties

12,916 Units in 1 and 2 Unit properties

+7.3% since 2021

-32.5% since 2021

-8.6% since 2021

airbnb 400 entire home rentals listed²

¹ Source: Analysis of City of St. Paul Department of Safety and Inspections Fire Certificate of Occupancy data. Note: The City of St. Paul requires inspections of non-owner-occupied housing units on a regular basis. Class C and Class D properties are those that are least compliant with all state and local safety codes, triggering re-inspection every two years (Class C) or one year (Class D). Reported units only include those which receive a Fire Certificate of Occupancy grade, a practice which is only required for single family homes and duplexes that are not owner-occupied, and for rental properties of three or more units, and excludes units that mix residential with other uses.

Multifamily (5+) Units Permitted for New Construction¹

Q4 2021 through Q3 2022

813 Units

-68% year over year

5-year view

Average Price-Per-Unit Apartment Sales²

Four quarters ending Q3 2022

$141,649 Per unit

35% up from previous 12 months

¹ Source: HUD’s SOCDS Building Permits Database, which contains data on permits for residential construction collected in the Census Bureau’s Building Permits Survey. While some multifamily construction may contain units built for sale (e.g. condominiums), recent analysis by the Urban Institute recently indicated those units only account for 5.4% of all permitted multifamily units, nationwide (The Housing Market Needs More Condos. Why Are So Few Being Built?, Neal, Goodman; January 2022).

² Source: This analysis is based on research conducted since 2011 exclusively on projects vetted or written about by Finance & Commerce publication for its Twin Cities Apartment Sales Tracker, available at finance-commerce.com.
